

Spare parts circuitboards ai

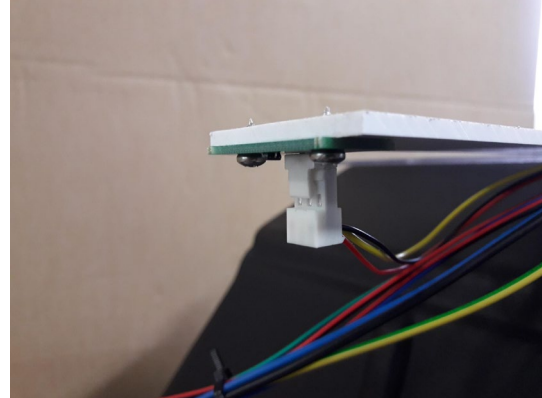

Main circuit board

Liquid level sensor
Optical sensor, the “flag” covers the sensors. Indicates level of liquid according to float in tray L1-4

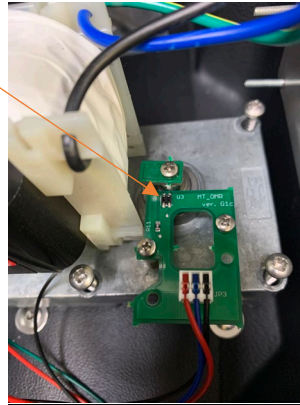

Seat sensor
Operates by magnet sensor inside the seat.

Compost sensor
Operates by the compost level in upper chamber, when level reaches upper rake the sensor activates by a small magnet through the axle

Mixer motor sensor
Optical sensor activates the motor to
start and stop each turn

Display
